thanks Charlie, I had not seen this. I will share it with our person who signed up to the data/monitoring workgroup and see if she has any comments. I was more interested at this point in proposals to evaluate/address sources of nitrate pollution. Do you have any proposals that you can share?

Tom,
Here is a proposal for long term nitrate monitoring; I have sent it to one of our hydro geologists helping with the GWMA (Melanie Redding) for her evaluation.

Subject: GSI Proposal

Attached is a proposal that Yakima County Farm Bureau and the Yakima Valley Dairy Federation asked GSI Water Solutions to put together. We offer this as a point of discussions for our next budget meeting. Our first priority would still be to offer assistance to those with water in their wells exceeding 10ppm N.
